Assignment –3
Overview of SQL.

Name: Ashish Prasad   **Roll no: 86670**

Batch: KD2

1) Does ANSI recognize the data type DATE?
Ans: YES,

--The DATE type is used for values with a date part.

--MySQL retrieves and displays DATE values in 'YYYY-MM-DD' format.

-- The supported range is '1000-01-01' to '9999-12-31'.

--

2) Which subdivision of SQL is used to insert values in tables?
Ans:

---In SQL, the INSERT statement is used to insert values into a table. --The syntax for using the INSERT statement typically falls under the **Data Manipulation Language (DML) subdivision of SQL**.

Syntax for Insert:
INSERT INTO table_name (column1, column2, column3, ...)
VALUES (value1, value2, value3, ...);
